ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.17 Multiplexer Cross-Connection

Multiplexer Cross-Connection (MCC) will be charged per cross-connect per central office, where the cross-connection is performed. If MCC is provided between two Telephone Company offices where multiplexing is performed, Channel Mileage and Channel Mileage Terminations for the lower speed service will apply between the two central offices along with one MCC charge per cross-connect per central office.

When one service is cross-connected to another service, the two cross-connected services are treated separately for service performance measurement and service interruption credit purposes.

If two customers are involved, one customer will be responsible for the entire billing of MCC. The responsible customer must obtain a Letter of Authorization (LOA) from the second customer and submit it to the Telephone Company with the Ameritech DS1 and/or Ameritech DS3 system and channel assignment information for the lower speed services being cross-connected.

7.4.18 Nonrecurring Charge (NRC) Waiver

The NRC Waiver is a one time offering that for a limited period of time waives all noncurring installation and service rearrangement charges for Ameritech DS1 and Ameritech DS3 Services located in zone 1 and zone 2.

The NRC Waiver will be available for 90 days. The 90 day period will begin on the effective date of this tariff. The Waiver will apply to any orders for service received and completed during this period.
